SUMMARY

A motivated Software Engineer with practical experience in web development and a strong foundation in building responsive, functional web applications. Skilled in PHP and Laravel for backend development, with proficiency in HTML, CSS, and Bootstrap for creating clean user interfaces. Experienced in MySQL database management and implementing secure authentication systems. Completed comprehensive internships involving real-world projects including workflow management systems and frontend development. Recently completed Bachelor's degree in Software Engineering from ISRA University. Passionate about writing clean, maintainable code and delivering practical solutions that meet business requirements.

EDUCATION

ISRA University Hyd
Software Engineering

Pakistan
Jan 2022 – Dec 2025

SKILLS

- Frontend: HTML, CSS, Bootstrap
- Backend: PHP, Laravel
- Database: MySQL
- Version Control & Tools: Git
- Programming Languages: C++, Python
- Testing & QA: Postman (API Testing), UI Testing, Functional Testing, Jira
- Other Tools & Technologies: SMTP Integration, Authentication Systems, Middleware, Real-time Database Operations

EXPERIENCE

INTRAPRENEUR.

Software Quality Assurance (SQA) Intern

Jan 2025 – Present

Hyderabad, Pakistan

- Performing API testing using Postman to validate endpoints, request/response handling, and data integrity
- Conducting UI and functional testing on mobile applications to ensure quality standards and user experience
- Utilizing Jira for bug tracking, test case management, and collaboration with development teams
- Identifying and documenting software defects, ensuring timely resolution and quality improvement

Civil Aviation Training Institute (CATI).

Software Engineer Intern

Jun 2025 – Jul 2025

Hyderabad, Pakistan

- Developed a complete Workflow Management System using Laravel to automate tasks, workflows, and reporting
- Implemented role-based authentication and middleware-based access control for secure system operations
- Built real-time task assignment modules to improve operational efficiency and team collaboration
- Collaborated on front-end development, SMTP integration, and CRUD operations

GMG Solutions.

Front-end Developer Intern

Aug 2023 – Oct 2023

Hyderabad, Pakistan

- Worked on designing and implementing web applications with focus on user experience and responsive design
- Enhanced skills in HTML, CSS, and Bootstrap while contributing to production-level applications
- Gained hands-on experience in modern web development practices and team collaboration

Self-Initiated Projects & Development.

Nov-2023 – Jan 2025

Hyderabad, Pakistan

- Developed multiple full-stack applications including management systems, e-commerce platforms
- Built responsive and dynamic web applications using, Laravel, PHP, and MySQL
- Implemented CRUD operations, authentication systems, and real-time data handling
- Created admin panels with role-based access control and comprehensive user management features

Key Projects

Bus Management System

PHP & MySQL

- Designed and developed a web-based system to efficiently manage buses, routes, and passenger booking
- Implemented separate panels for administrators and users with complete CRUD operations
- Created features for route management, bus scheduling, category management, and team details

Workflow Management System

Laravel

- Developed during CATI internship to automate tasks, workflows, and reporting
- Implemented SMTP integration, role-based authentication, and real-time task assignment
- Enhanced operational efficiency through comprehensive workflow automation

CERTIFICATIONS

Certificate in Computer and Business Management – Dynamic Training Solutions

May-2019 – Nov 2019

English Language Certification – Domino English Learning Centre

May-2018 – Aug 2018
