

MUBEEN QAZI

Software Quality Assurance Engineer

+92 312 3001579 | mubeenqazi707@gmail.com | linkedin.com/in/mubeen-qazi | Hyderabad, Pakistan

PROFESSIONAL SUMMARY

Detail-oriented Software Engineering graduate with hands-on experience in Software Quality Assurance, API testing, load & performance testing, UI/functional testing, and defect management. Familiar with the full software development lifecycle (SDLC) and software testing methodologies. Proficient in Postman for API testing, JMeter for load and performance testing, Jira for bug tracking and test case management, and SQL for data validation. Experienced in testing real-world fintech and government platforms. Strong analytical and problem-solving skills with the ability to identify defects, document findings clearly, and collaborate effectively with development teams to ensure high-quality software delivery.

TECHNICAL SKILLS & COMPETENCIES

QA & Testing: API Testing (Postman), Load & Performance Testing (JMeter), UI Testing, Functional Testing, Test Case Design & Execution, Defect Reporting, Regression Testing, Bug Lifecycle Management

Tools & Bug Tracking: Jira, Postman, JMeter, Git

Database: MySQL — writing & executing SQL queries, data validation, data integrity checks

Programming & Scripting: PHP (Laravel), Python, C++, HTML/CSS — Object-Oriented Programming (OOP) concepts applied

Application Knowledge: Web applications, REST APIs, Role-based access control, CRUD operations, Authentication systems, Middleware, Payment gateways, POS systems

Core Competencies: Attention to detail, Analytical thinking, Problem-solving, Planning & organizing, Teamwork, Written & verbal communication (English)

PROFESSIONAL EXPERIENCE

Junior SQA Engineer | Intrapreneur

Jan 2026 – Present

Hyderabad, Pakistan

- Performing manual and API testing using Postman on the NamiPay payment gateway project — a Saudi Arabia-based Fintech platform — validating REST endpoints, request/response handling, data integrity, and transaction security
- Conducting comprehensive UI and functional testing on mobile applications and web platforms to ensure high quality standards, smooth user experience, and compliance with business requirements
- Utilizing Jira for test case creation, bug tracking, defect reporting, and effective collaboration with development teams to ensure timely resolution of issues
- Identifying, documenting, and prioritizing software defects while contributing to overall quality improvement in fintech payment systems
- Executing regression testing cycles to ensure system stability after each release and feature update

Software Engineer Intern | Civil Aviation Training Institute (CATI)

Jun 2025 – Jul 2025

Hyderabad, Pakistan

- Developed a complete Workflow Management System using Laravel, enabling automation of tasks, workflows, and reporting
- Implemented role-based authentication, middleware-based access control, and SMTP integration — gaining deep understanding of application architecture and security flows applicable to QA
- Built real-time task assignment modules; performed functional validation and testing throughout the development cycle
- Collaborated on CRUD operations and ensured data integrity across modules — directly applicable to identifying system weaknesses and bottlenecks during QA

Front-end Developer Intern | GMG Solutions

Aug 2023 – Oct 2023

Hyderabad, Pakistan

- Designed and implemented responsive web application interfaces, building practical understanding of UI/UX structure essential for functional and UI testing
- Gained hands-on experience in HTML, CSS, and Bootstrap within a professional team environment using modern web development practices

EDUCATION

Bachelor of Software Engineering

ISRA University, Hyderabad, Pakistan

Jan 2022 – Dec 2025

KEY PROJECTS

NamiPay — FinTech Payment Gateway | API Testing, Postman, Jira

- Tested a Saudi Arabia-based payment platform processing digital transactions, POS solutions, and payment integrations
- Ensured reliability of payment processes through API testing, load testing using JMeter, and regression testing cycles
- Validated transaction security, data integrity, and third-party integrations to ensure end-to-end payment accuracy
- Tested edge cases in payment flows including failure scenarios, timeout handling, and retry mechanisms

SSPA — Sindh Social Protection Authority | Postman, JMeter, Jira, REST APIs

- Performed QA activities on a large-scale government digital platform serving social protection program beneficiaries across Sindh
- Conducted API testing using Postman to validate government service endpoints, request/response accuracy, and data integrity
- Executed load and performance testing using JMeter to assess system behavior under high concurrent user traffic
- Reported and tracked defects in Jira with detailed reproduction steps; contributed to regression testing for mission-critical releases

Workflow Management System | Laravel, PHP, MySQL

- Built during CATI internship to automate business workflows, task assignments, and operational reporting
- Implemented SMTP integration, role-based authentication, and real-time operations; validated functionality and tested edge cases throughout

Bus Management System | PHP, MySQL

- Developed a web-based system for managing buses, routes, scheduling, and passenger booking with separate admin and user panels
- Implemented complete CRUD operations and validated all modules for data correctness and integrity
